

Dr. Barry Sears' OmegaRx™ Ultra-Refined Fish Oil Information Sheet

The role of essential fatty acids in the body have been widely studied. The body of knowledge consists of thousands of scientific studies including hundreds of clinical studies on Omega-3 Fatty Acids.

Scientific evidence reveals a diet rich in long-chain Omega-3 Fatty Acids helps support: healthy brains*, healthy hearts*, healthy immune systems*, healthy joint movements*, healthy kidneys*, a balanced mood and sense of well-being*, strength and stamina*, and helps maintain cholesterol levels that are already within normal range*.

History has shown, and scientists have found, that the Eskimos of Greenland suffered very little from coronary heart disease despite a diet very high in fat. The primary source of fat in their diet came from sea mammals which contain high amounts of long-chain Omega-3 Fatty Acids.

The American Heart Association recommends healthy people eat Omega-3 Fatty Acids from fish and plant sources to protect their hearts.

Why Choose OmegaRx™ Ultra-Refined Fish Oil?

* OmegaRx™ Ultra-Refined Fish Oil is twice as potent and 100's of time more pure than typical health food grade fish oils. According to Dr. Sears, ultra-refined fish oil has some very distinct characteristics:

- * Concentration of EPA & DHA > 60%
- * Concentration of PCB's < 45 ppb/g
- * Concentration of Dioxins < 1 ppt
- * Concentration of Mercury < 10 ppb

* Most people will not experience mild gastric upsets often found with high doses of health food grade fish oil.

About Dr. Sears: Dr. Barry Sears is a leading authority in the field of drug delivery systems and dietary control of hormonal response. He holds thirteen US patents in his field of medicine.
